FIFTY  
YEARS  
FASTER

**O'NEAL**

## SINCE 1970

IN THE FOOTHILLS OF LOS ANGELES, CALIFORNIA DURING THE 1960'S A YOUNG MAN NAMED JIM O'NEAL WOULD RIDE HIS MODIFIED TRIUMPH TO HIGH SCHOOL. AFTER SCHOOL AND ON WEEKENDS JIM WOULD PUT HIS BIKE THROUGH ITS PACES, HITTING THE DIRT TRAILS AND CARVED TRACKS THAT PEPPERED THE HILLSIDE ABOVE THE CITY. IN 1966, THESE SAME RIDING LOCATIONS BECAME HOST TO AMERICA'S FIRST MOTOCROSS RACE AT HOPETOWN. IT WAS THEN THAT JIM'S PASSION FOR RIDING TURNED TO RACING AND IN 1970, O'NEAL WAS BORN.

NOW, 50 YEARS LATER, YOU CAN STILL FIND THE O'NEAL US OFFICE JUST A FEW MILES FROM THE OLD HOPETOWN TRACK. IN THAT OFFICE, OUR DEDICATED TEAM MEMBERS ARE WORKING TO DEVELOP PRODUCTS THAT WILL ALLOW OUR RIDERS TO GO FURTHER AND RIDE FASTER THAN EVER BEFORE. JIM O'NEAL HASN'T QUIT RIDING AND CAN BE FOUND ON THOSE TRACKS AND TRAILS JUST OUTSIDE THIS GREAT CITY, PUSHING HIS PASSIONS TO THE LIMITS EVERY CHANCE HE GETS. YOU CAN STILL FIND O'NEAL PRODUCTS AT NEARLY 7,000 RETAIL LOCATIONS WORLDWIDE.

**HELMETS**

HELMET ROTATIONAL IMPACT  
ABSORPTION TECHNOLOGY  
FROM **O'NEAL**

NEW HELMET ROTATIONAL IMPACT ABSORPTION TECHNOLOGY  
DESIGNED TO REDUCE HEAD INJURIES CAUSED BY LOW SPEED  
AND ROTATIONAL IMPACTS DURING CRASHING.

**IPX® ACells.**

Welcome to the next generation  
of helmet safety.

Welcome to the next generation of helmet safety – IPX® ACells rotational impact absorption technology. It is designed to reduce head injuries caused by rotational and low-speed impacts.

The **IPX® Absorption Cells (ACells)** use a specially engineered polymer foam, developed to make our helmets some of the safest on the market in the event of a crash.

Every part of each individual **IPX® ACells** has been specifically engineered to work together to provide the ultimate in crash protection:

### FLEX-SYSTEM & PENTA-GEOMETRY

Guarantees instant reaction to rotational impacts and enables the ACells to deform depending on the direction of rotational forces to minimize head injuries.

**PENTA-GEOMETRY**

**NORMAL POSITION**

**MOVING RIGHT**

**MOVING LEFT**

### INJECTED ANTI-FRICTION DISC, LOW-SPEED-IMPACT-ABSORPTION & FLEXIBLE CORE

The soft and flexible polymer material helps to protect against forces caused by low speed impacts. It absorbs these forces before the EPS (expanded polystyrene) performs its function at higher speed to protect against bigger impacts.

**INJECTED ANTI-FRICTION DISC**

**FLEXIBLE-CORE**

**IPX® ACells** are available in selected **O'Neal** helmet models and were developed in conjunction with multiple MTB Downhill World-Cup winner and multiple MTB Downhill World Champion Greg Minnaar:

- **RACE-READY: IPX® ACells** do not affect the fitting of the helmet liner. Helmets with **IPX® ACells** do not bounce or move on the head during riding.
- **ENHANCED-FOREHEAD-PROTECTION:** The positioning of **IPX® ACells** enhances the performance for direct or oblique frontal impacts, using lots of individual components and positioning them more towards the front of the helmet.

# HELMET FEATURES

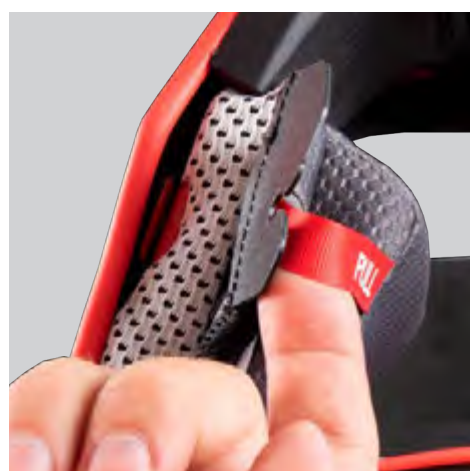

## IPX® ACELLS:

Advanced safety with the IPX® ACELLs. Designed to reduce head injuries caused by rotational and low-speed impacts during crashing. Pre-installed in O'NEAL's premium helmets and as option to install after-market for various MX and MTB helmets.

## HYDRATION HOSE GUIDE:

Two simple holes inside the side EPS allows easy installation of the hydration hose guide. Available as option for various full face helmets.

## EMERGENCY PULL STRAP:

In case of a crash you can easily get the helmet cheek pads out by pulling the red loop. This function allows to take off your helmet without any additional pressure on the neck.

**FIDLOCK®:**

*O'Neal Fidlock® magnetic buckle (engineered in Germany) for easy, single-handed fastening and release, provides maximum security while riding. Standard for O'NEAL MTB helmets and also installed in the 3SRS Hybrid MX helmet.*

**GOPRO MOUNT:**

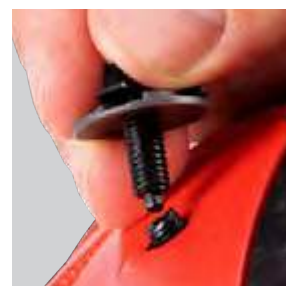

*Allows easy use of your camera while riding. Most of our helmets are designed to work with this mount. Some have it included and for others it is optional.*

**AIRFLAPS™:**

*AIRFLAPS™ is light and easy to install without any helmet modifications. AIRFLAPS™ increases ventilation, preventing overheat and/or fog formation for more performance. AIRFLAPS™ enables the rider to always keep his eyes protected for more safety and comfort.*

**SCREWS:**

*Solid aluminum screws or ABS Break-Away-Screws. O'NEAL's premium helmets come with aluminum screws and other helmets have the innovative Break-Away-Screws for additional safety. Both available after-market depending on which works best for you. Both screw sets fit all of our full-face helmets.*

Once the screw is broken, you can easily remove the thread with one of the other screws.

**BIKE HELMETS**

# BLADE CARBON & HYPERLITE

## DEVELOPED WITH GREG MINNAAR:

Greg Minnaar chooses the O'Neal Blade helmet for his World Cup campaign. Together with Greg we developed a fresh-looking modern helmet with a ton of ventilation and maximum safety in a lightweight package, suitable for both DH and Enduro.

The range includes the flagship top-end carbon race version, as chosen and raced by Greg, plus Hyperlite options in several colours and graphics and 2 versions (the carbon and 1 of the fiberglass versions) with our new IPX ACells technology.

## ADVANCED RACING TECHNOLOGY:

### FIDLOCK® BUCKLE

Super easy to open and close the buckle with one hand, even with gloves on and it is of course tested to the same international standards as the traditional double-D closure system.

### AIR VENTS

Using over-sized vents the Blade delivers maximum airflow making it perfect for longer trails, including Enduro stages, as well as DH.

### 2 SHELL & EPS CONSTRUCTION

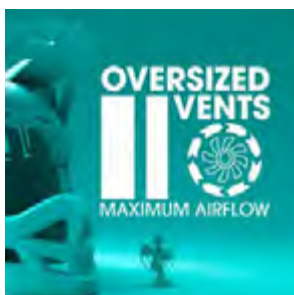

Using 2 outer shells and EPS liner sizes we were able to achieve a more snug and tailored fit for every rider vs many helmets out there.

### IPX ACELLS

The Blade is the first helmet to incorporate O'Neal IPX ACells technology – the only system on the market with a full 360° rotational and axial movement ability as well as damping properties making it outperform most other technologies out there.

### SAFETY

The Blade exceeds EN1078 safety standard for bicycle Helmets and fulfills ASTM Downhill standard.

2020

**BIKE HELMETS**

#### FEATURES:

- Carbonfiber 2-shell lightweight construction for perfect individual fit
- Weight: XS-M: 1.100 g ( $\pm 50$ ); L-XL: 1.150 g ( $\pm 50$ )
- Oversized vents for maximum airflow and cooling
- Sweat-absorbing and removable, washable inner liner
- Height adjustable visor
- Fidlock® magnetic buckle for easy, single-handed fastening and release
- Incorporating IPX® ACells helmet impact absorption technology
- Designed to reduce head injuries caused by low speed and rotational impacts during crashing
- Durable multi-colored clear-coated graphics
- GoPro® mount included
- Exceeds EN1078 safety standard for bicycle helmets and fulfills ASTM Downhill standard

# OUR NEW PIKE

## INTRODUCING THE ALL-NEW PIKE HELMET FROM O'NEAL:

We set out 2 years ago to develop one of the best looking, safest and best fitting open-face MTB helmets on the market. The result, we think, delivers on our original aims.

### GREAT LOOK AND FIT:

The compact 2-piece racing shell gives a well proportioned look as well as 2 outer shell sizes alongside our new 3D Multi-Positioning System giving a great fit. The adjust works up-down, front-rear and open-close giving what feels like a truly tailored fit for all head shapes and sizes.

The ratcheted visor allows on-the-fly adjustment and in the topmost position gives plenty of room to rest goggles when not being used, tucked safely under the visor but off the face.

### SAFETY = PRIORITY:

In the ACCELLS version we have incorporated our IPX ACCELLS helmet impact protection system, giving increased protection against not only rotational impact but also low-speed impacts. Developed for our top-end Blade full-face helmet and now incorporated into the Pike, we genuinely believe this is one of the safest, if not the safest, helmets onto market. The ACCELLS technology can also be retro-fitted very easily into all Pike models and colors.

As always the top-end spec. on the Pike is not reflected in the price and yet again we deliver all this at a very competitive price.

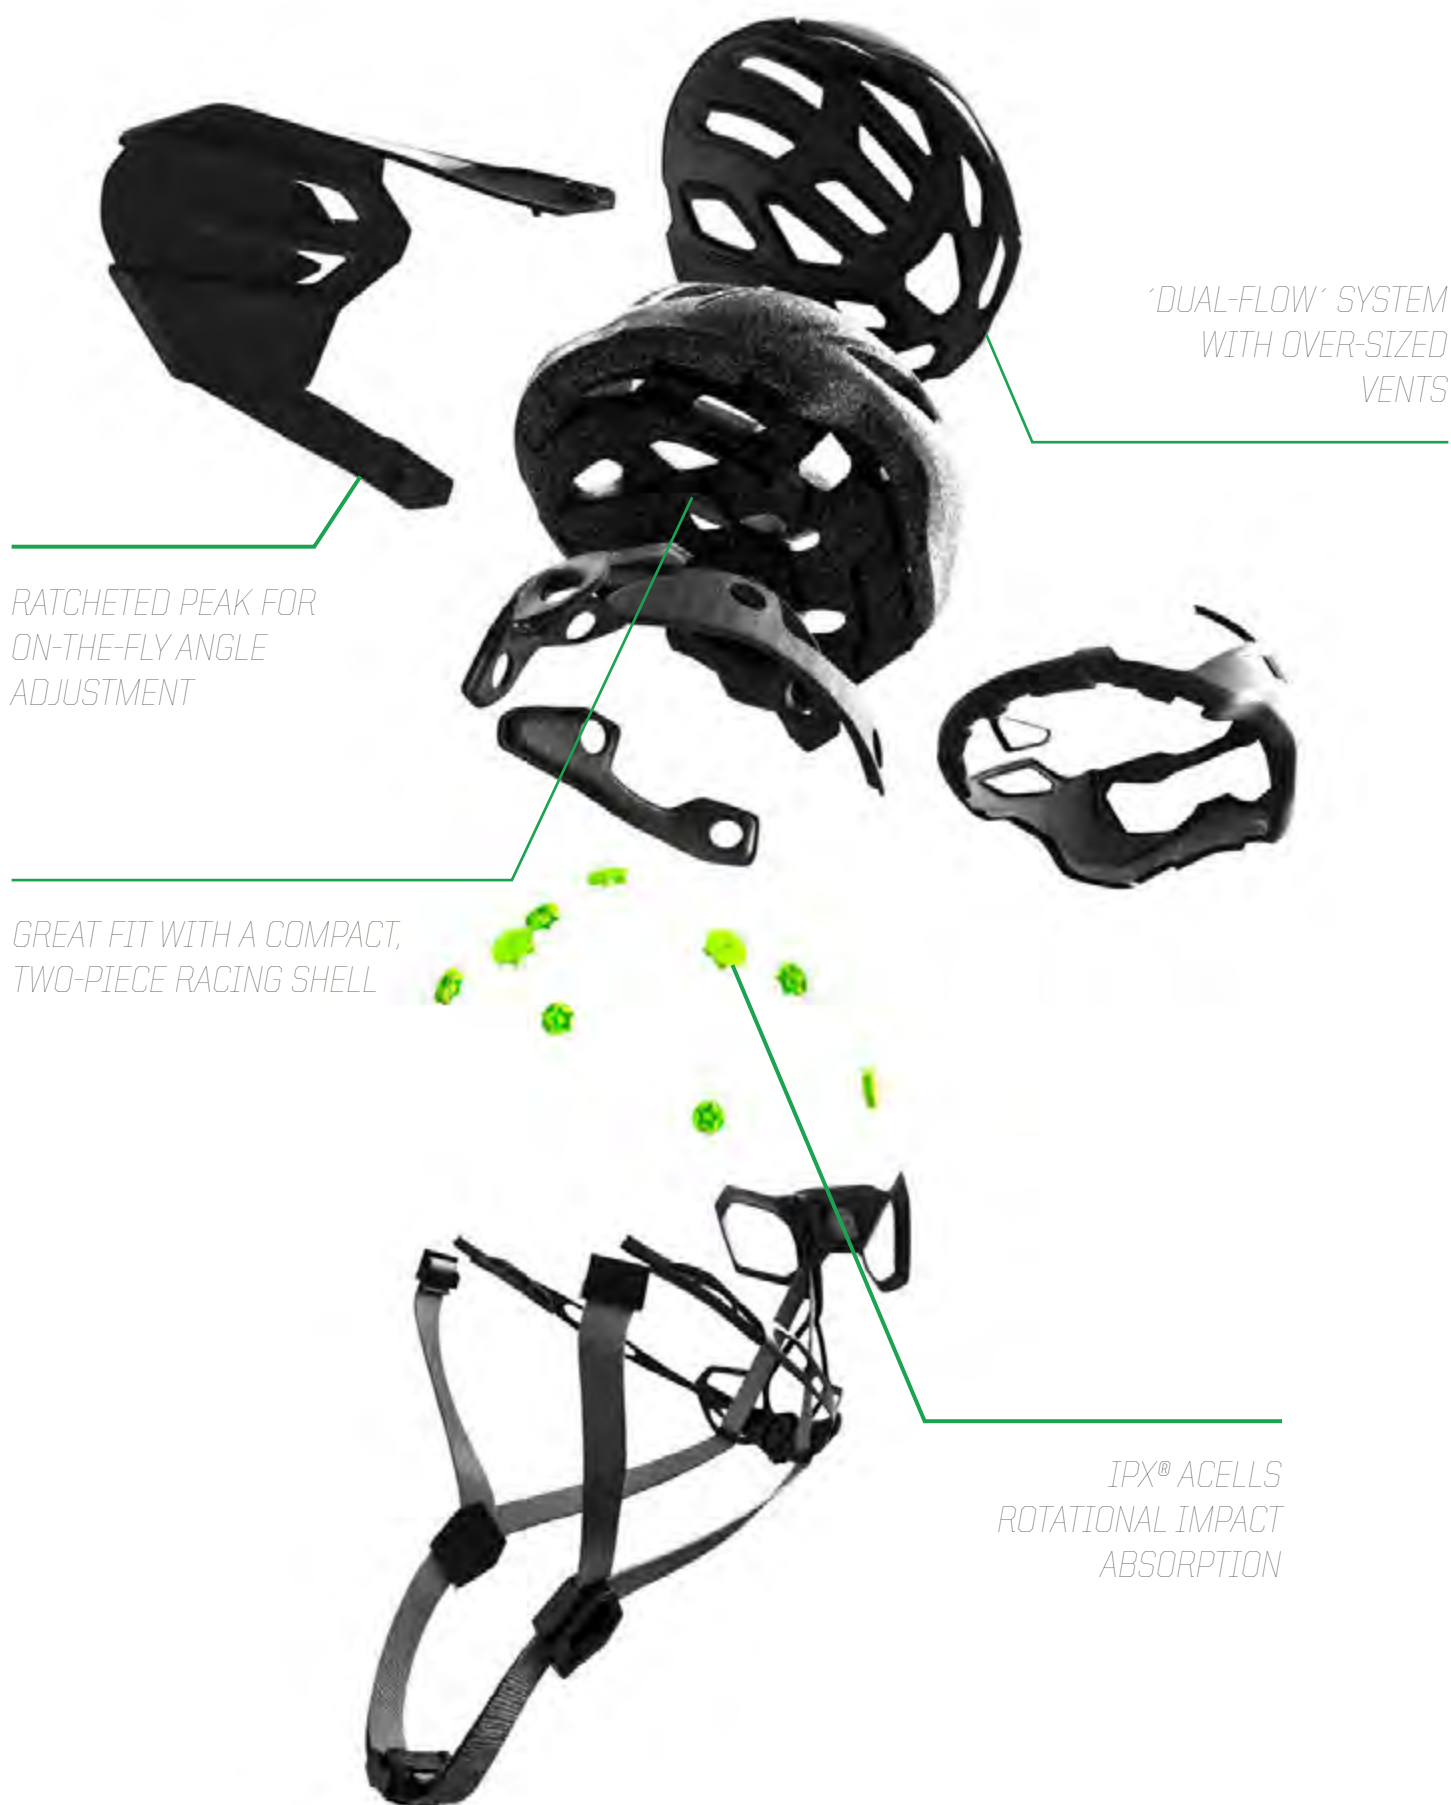

### FEATURES:

- Enduro/ Trail/ All Mountain helmet with in-mold technology for increased protection and energy dispersion
- Compact, two-piece racing shell with a high-quality finish
- Incorporating IPX® ACCELLS helmet impact absorption technology optional available / or pre-installed.
- Ratcheted peak for on-the-fly angle adjustment
- Unique 'Dual- Flow' System with over-sized vents for improved and constant air circulation inside the helmet
- 3D Multi-Positioning System for perfect adjustment in 3 directions: up-down, front-rear, open-close
- Fidlock® magnetic buckle for easy, single-handed fastening and release
- Accommodates goggles under peak when in top-most position and rest securely in place on ridge at back of shell
- Lightweight construction: polycarbonate shell, EPS liner
- Sweat-absorbing and removable washable inner liner
- Extended coverage at the back of the head
- Weight: 390g (±25g)
- Exceeds EN1078 safety standard for bicycle helmets

## THE ALL NEW O'NEAL LOAM WP SPD SHOE:

The all-new 2019 O'Neal Loam WP SPD shoe. A race-ready 3-4 season Enduro/ DH shoe disguised as a winter waterproof shoe! Fully water-proof and breathable, tested down to 0°C, but equally at home in 20°C+ conditions. Versatility redefined!

*Gusseted tongue, micro-adjust lacing and neoprene ankle gator*

*Fully waterproof and breathable*

*Thermal insulation*

*All-new SPD Adventure outsole*

**VERSATILITY:**

The 2019 O'Neal Loam WP SPD mountain bike shoes are so much more than just a winter waterproof product. With the Loam we have created one of the most versatile MTB shoes on the market. It goes without saying that the Loam is 100% waterproof and breathable, perfect for even the worst winter riding conditions. Protection from the elements is increased further with the gusseted tongue, full hook and loop lace cover and neoprene ankle gaiter to prevent any water or dirt ingress.

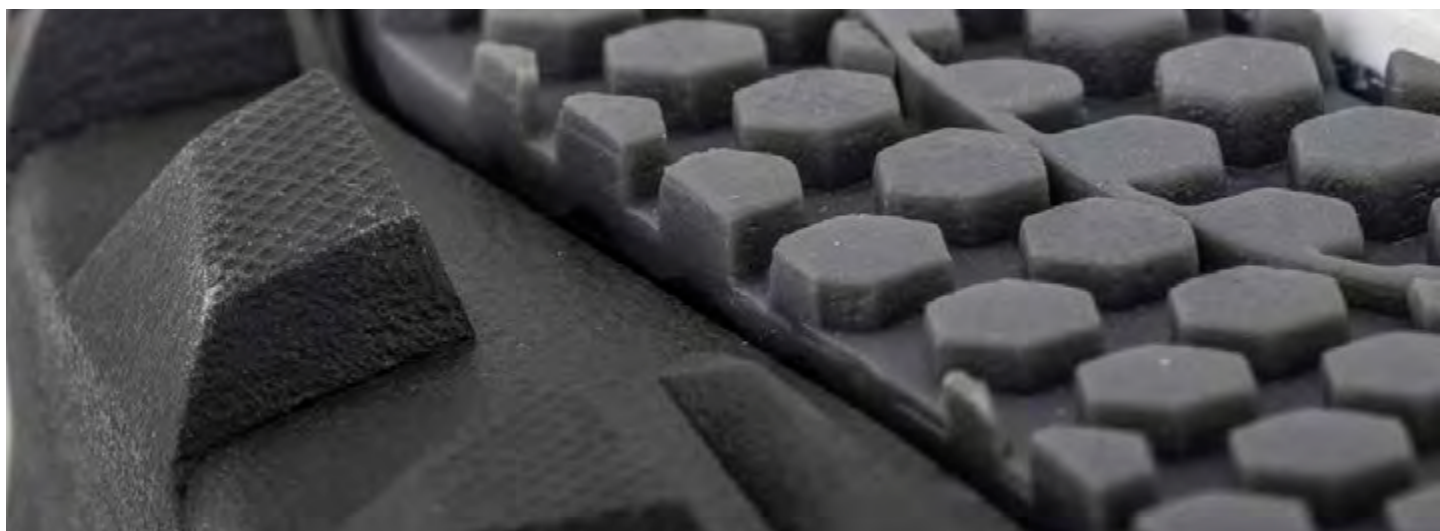

**GREAT 3-4 SEASON SHOE:**

We have added a layer of thermal insulation and this has been rigorously tested by riders in the winter in Queenstown, NZ, down to around 0C. The toe box of the Loam is also wider than usual, allowing the toes to move and encourage blood circulation but the ankle and heel are still a snug fit to ensure a great fit and maximum power transfer to the pedals. This approach means the Loam performs down to 0C without making the level of insulation too much. The shoe can also therefore be used comfortably up into 20C+ without over-heating.

This 3-4 season use plus the reinforced toe and heel areas mean the Loam is the go-to choice for our DH and Enduro racers. The steel shank allows super efficient power transfer.

**GRIP OFF THE BIKE:**

The all-new Adventure outsole gives great traction on off the bike in muddy conditions. Whether you want a true winter waterproof shoe and/ or a shoe you can rely on when racing DH or Enduro then the Loam is the perfect choice.

# SENDER FLAT

**INTRODUCING THE NEW SENDER FLAT MTB SHOE:  
STICK BUT DON'T GET STUCK!**

Race-ready top-end flat MTB shoe...at an affordable price!

#### **NEW HONEY RUBBER SUPERGRIP OUTSOLE:**

2 years in development, the new Sender Flat MTB shoe is the first model to use our new Honey Rubber Supergrip outsole. Using a tackier rubber than the traditional Honey Rubber outsole and a unique tread pattern, the Sender gives extra grip and confidence in even the rockiest of sections but still gives enough rotation to allow the foot to be repositioned without taking it completely off the pedal.

The perfect balance between grip and repositioning.

STICK BUT DON'T GET STUCK!

# **BIKE SHOES**

## GREAT CONCEPT:

- Revolutionary magnetic double-lens (silver mirror)
- Frameless design for maximum field of vision & perfect ventilation

## FEATURES & SAFETY:

- Equipped with double lens silver mirror
- Anti-scratch, Anti-fog & Anti-reflective coating
- Jacquard webbing strap (40 mm) with triple silicon stripes and TPR patch
- Triple foam layer for maximum comfort, durability & moisture wicking
- Tear-off pins integrated
- Regular & laminated tear-offs available
- Double lenses available in clear, gray, yellow, radium red, radium blue and silver mirror
- Meets standard EN 1938 for motorcycle eyewear and exceeds all ANSI norms
- Polycarbonate injected lenses are high impact resistant for maximum safety
- All lenses are 100% UV filtering
- All tinted lenses are 100% protective against UVA/B/C rays
- All tinted lenses equipped with Blue Blocker coating

## PRO PACK:

- Includes 1 x B-50 Goggle black/white, 3 double spare lenses (clear, yellow, radium blue), 10 pcs tear-offs, 1 x Mud flap, 1 x goggle pouch

BLACK/WHITE

NEON YELLOW

## PRO PACK: 6020-1030<sup>A</sup>
